WHAT EXACTLY IS POWER DELIVERY

Power Delivery is a new quick-charging standard which can deliver up to 240 Watts by means of the new USB Type-C connector. This means that not only small devices, such as smartphones, can be charged via USB Type-C, but that compatible notebooks, for example the Apple MacBook Pro, now no longer require an extra mains adapter.

MAXIMUM POWER!

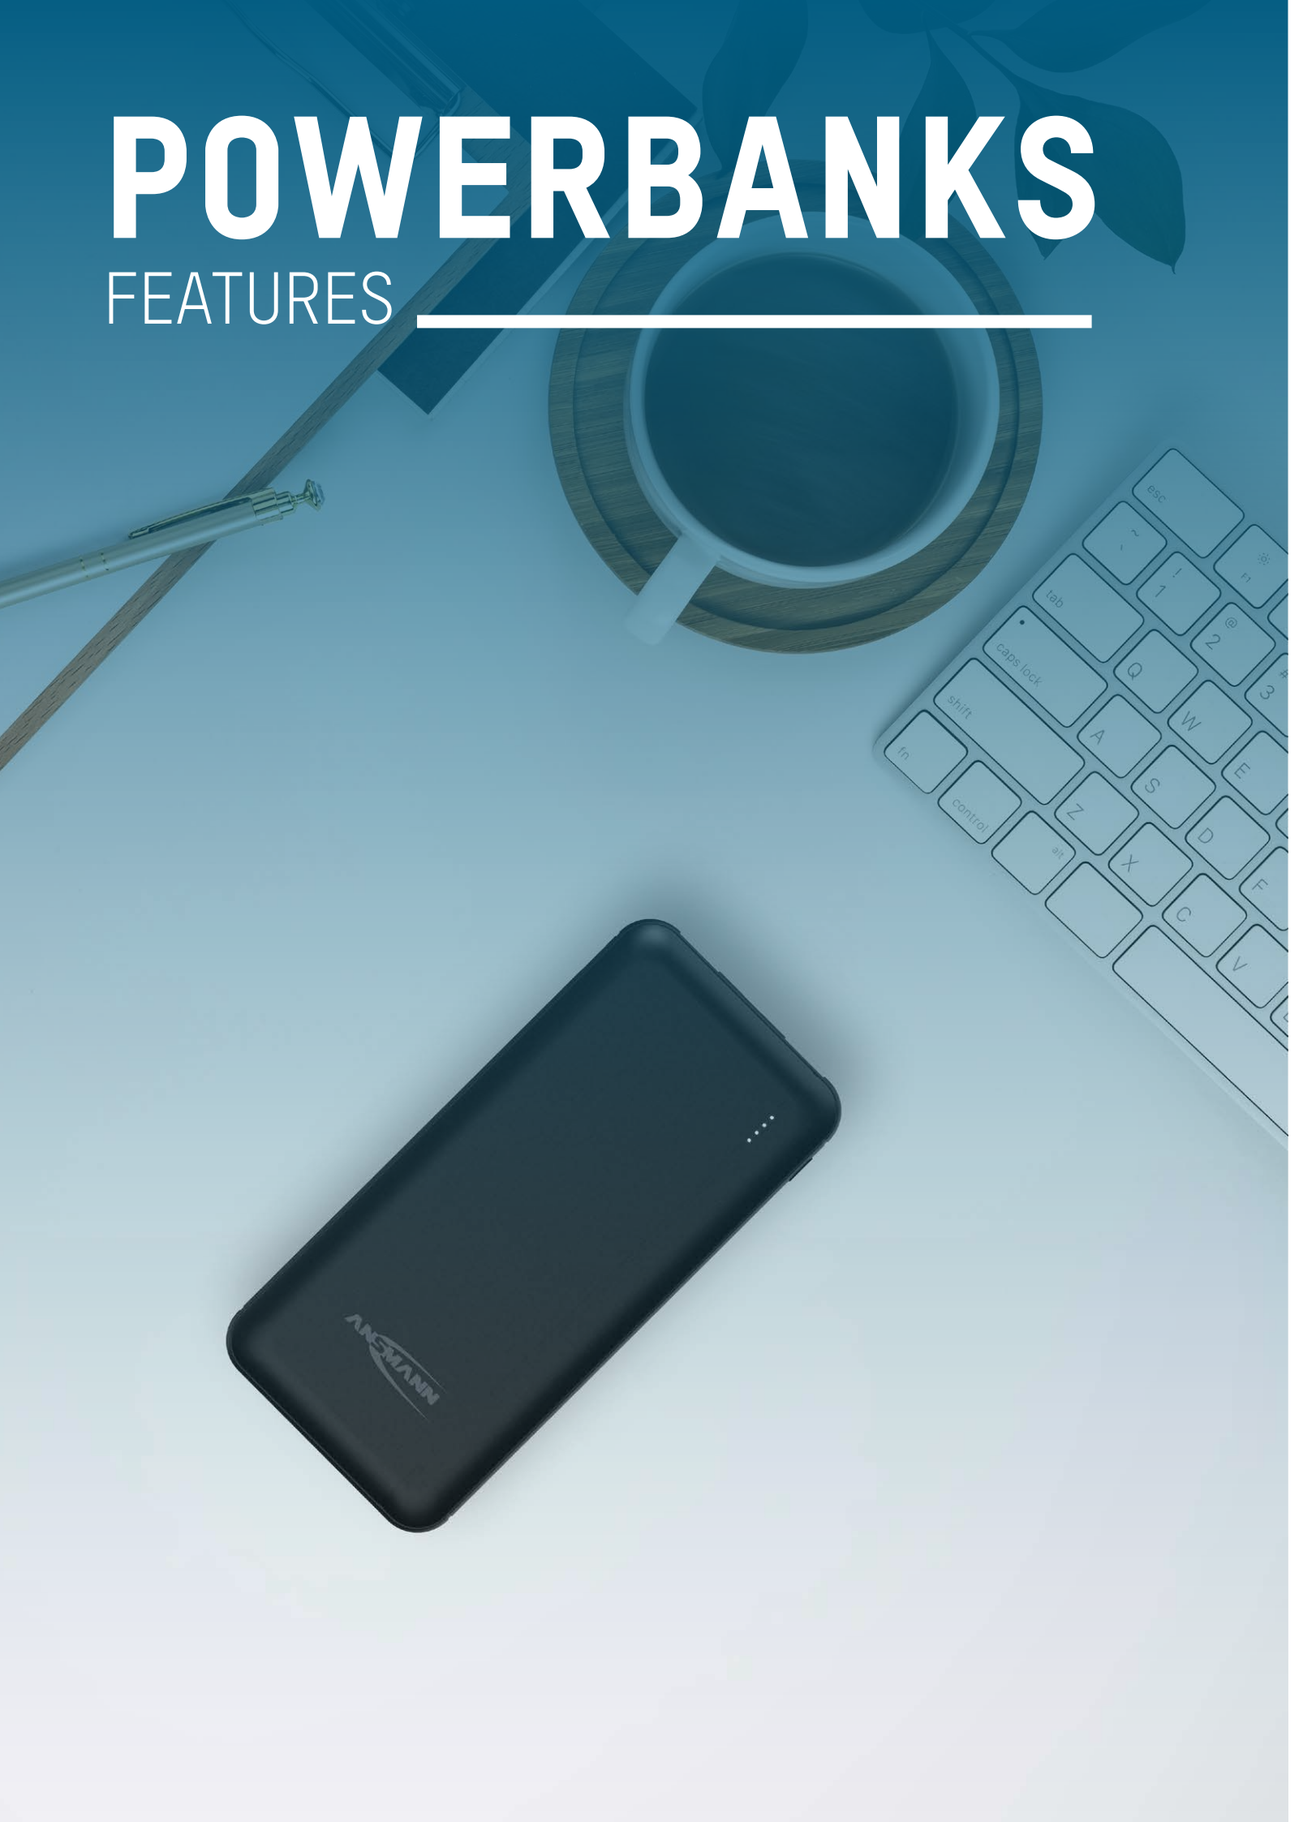

Power Delivery can **output up to 240 Watts**. This places it far ahead of the competition. Amongst other things, it also enables notebooks to be charged via USB Type-C.
