EUDR Conformity Statement

In accordance with the European Union Deforestation-free Regulation (EUDR), known as (EU) 2023/1115, we affirm that our product components containing rubber are made from synthetic materials. As synthetic rubber is not explicitly covered under the EUDR, these components are excluded from the regulation's scope. This ensures that our products comply with the EUDR requirements, which primarily target natural rubber and other commodities linked to deforestation:

Our commitment to sustainability remains steadfast. While synthetic rubber is not subject to the European Union Deforestation-free Regulation, we continue to uphold rigorous environmental standards across our supply chain. We prioritize transparency, traceability, and responsible sourcing practices to minimize our ecological footprint and contribute to global sustainability efforts:

We remain dedicated to ensuring that all our products meet the highest environmental and ethical standards. By focusing on sustainable practices, we aim to support the global fight against deforestation and forest degradation, aligning with the broader goals of the European Green Deal and the EU's commitment to protecting the world's forests

i.V. Patrick Megerle

[Head of Technical Department and Compliance]
